ข้อ1.1

**ข้อ 1.2**

ข้อ1.2.1

```
1    //1.2.1
2
3    const inputItem = document.getElementById("item");
4    const inputQty = document.getElementById("qty");
5    const Submit = document.getElementById('btn-submit');
6
7    const buyingList = document.getElementById("buying-list");
8    const Clear = document.getElementById('btn-clear');
9    const countPendingItems = document.getElementById('countPendingItems');
10   const countDoneItems = document.getElementById('countDoneItems');
11
12
13
14  ∨ Submit.addEventListener('click', event => {
15       let tokenItem = inputItem.value;
16       let tokenQty = inputQty.value;
17
18       //itemlistที่เพิ่ม
19       const itemlistElem = document.createElement('li');
20       const imgElem = document.createElement('img');
21       //ดึงรูป
22       imgElem.setAttribute('src', './images/pending.svg');
23       imgElem.setAttribute('alt', 'pending');
24
25       itemlistElem.textContent = `${tokenItem}, ${tokenQty} units`;
26
27       itemlistElem.appendChild(imgElem);
28       buyingList.append(itemlistElem, );
29       countadditem++;
30  })
```
